### PROFILE

Creative Frontend Engineer from Pakistan offering 1 years of experience providing high-impact JavaScript web solutions for diverse industry organizations. Skilled in developing and testing multiple web-based applications incorporating a range of technologies.

### PROMINENT PROJECTS

#### ► **UNIHUB - UNIVERSITY SCHEDULE AND GPA MANAGEMENT**

This project is designed to provide students with an organized and intuitive platform for viewing their academic schedules and calculating their GPA and CGPA. The application is developed using Next.js and tailored specifically for the students of the University of Lahore.

##### Key Features:

- **Timetable View:** Displays a well-organized and visually appealing timetable for Computer Science (CS) and Software Engineering (SE) degrees, utilizing data directly from the university's class schedule spreadsheet.
- **GPA and CGPA Calculation:** Offers tools for students to accurately calculate their GPA and CGPA, aiding in academic planning and performance tracking.
- **Beautiful UI:** Designed with a focus on user experience, the application features a clean and attractive interface that enhances usability and engagement.

#### ► **CHATTY - REALTIME CHAT WEB APPLICATION**

This project is designed to facilitate seamless real-time communication between users through the integration of Firebase Authentication and the Realtime Database.

##### Key Features:

- **User Authentication:** Implemented Firebase authentication for user account creation, login, and logout functionalities, ensuring a secure and personalized experience.
- **Realtime Chatting:** Leveraged Firebase Realtime Database to enable users to engage in dynamic, instantaneous conversations with their contacts.
- **Unique User Identification:** Implemented a system where users obtain a unique ID, allowing them to connect with others by sharing and adding each other to their contacts.
- **Profile Management:** Utilized Firebase Storage to allow users to upload and manage profile pictures, enhancing the personalization of user profiles.
